Objective

Software Engineer for producing desktop or web applications in an environment that enables me to learn on the job.

Skill Summary

- Linux server administration, including server applications such as Apache, MySQL, Postfix, Courier (IMAP and POP3). I am also proficient in using Linux as a desktop OS.
- Languages: Proficient in Python (and the Django framework), Java, Perl, and PHP. I have experience using Ruby, Objective-C, C, and C++.
- Databases: Experience using MySQL, PostgreSQL and SQLite.

Experience

SENDOUTCARDS.COM
Programmer, Systems Administrator

*Salt Lake City, Utah
Mar 2003-Present*

- Maintained and added features to our web based software application, written in Perl
- Helped rewrite our Perl/CGI based software in Python/Django
- Set up and maintained our server cluster with a combination of the web proxy Pound, NFS, and MySQL replication.
- Played a key roll in purchasing new storage and web server hardware.
- Developed new desktop applications in Java and Python to help maintain several of our systems.

NET-BIZZ.COM
Programmer

*Alpine, Utah
Feb 1999-Dec 2002*

- Maintained and added features to our main software application, written in Perl.
- Wrote new applications in Perl and PHP to help the company better manage it's time.
- Rewrote our main Perl/CGI based application in PHP and MySQL.

Open Source Community Involvement

Exaile (<http://www.exaile.org>) - Python: Creator and lead developer in the project. Since it was made publicly available in March 2006, Exaile has grown a large user base. It is available in most of the major Linux distributions, and has received reviews from Linux.com and PC World magazine.

Jbother (<http://www.jbother.org>) - Java: Creator and lead developer in the project. Several universities (such as UCLA) have modified this project for education or for use in their systems.

Education

Graduated from Lone Peak High school (Highland, Utah) in 1998.
